- Our solutions are built such to help bring down overall cost
- Technologically advanced digital transmission of voice offers better quality and higher speed
- With benefits of wireline and convenience of wireless connectivity, you get what works best for you
- Enterprise friendly billing system allows transparency and accuracy
- You get ease and convenience of getting voice and data on a single reliable network
- Our solutions are designed, keeping in mind your scalability requirements
- You get freedom from technology obsolescence since we take care of all technology upgrades at no additional cost

BUSINESS ADVANTAGES

PRI, SIP TRUNK, WALKY, CENTREX AND WIRELESS EPABX SERVICES

Our Primary Rate Interface (PRI) solution has 30 channels providing voice, data, image and video services on a single link. Each channel can be configured as incoming, outgoing or two-way.

SIP Trunk with its best in class IP solution replaces fixed PSTN lines with single physical link, thus reducing cost. This reduces the cost of multiple lines as well as hardware requirements for multiple PRI Ports. To overcome issues related to scalability, maintenance and convergence, you can opt for this innovative solution.

Our Walky is a feature-rich wireless phone that has changed the way businesses perceive and use fixed lines. It seamlessly combines the functionality of a mobile and the comfort of a landline. Providing internet connectivity for up to 5 additional devices, this is ideal for a quick set-up at remote locations.

Centrex solution gives you a fully managed telecommunication service, be it at new premises or replacing/enhancing your existing system, with minimal

or no capital expenditure. This service simulates features of an EPABX and you get all features of an advanced EPABX without investing in one.

Wireless EPABX is a unique product offering that eliminates delays caused due to wireline feasibility checks and permissions. It is a portable, zero capital expenditure solution that requires only a monthly rental without compromising on quality benefits of a wireline connection. It is ideally suited for project locations and remote offices.

VARIANT COMPARISON

Feature	PRI	SIP Trunk	Walky	Centrex	WEPA BX
Interface	G.703	Ethernet	RJ 11	RJ 11	RJ 11
